Joe,

Having re-read my email to you I understand perfectly why you were confused. I think it was me who needed the coffee. Thanks again.

Joe,

We anticipate receiving a UIC permit application for a “full-scale” project in the near future. I am very interested in reviewing the permit document, application and any other related information if it is available. Please direct me to or perhaps share this information if not too much trouble. Thank you for reaching out to us.

Mark,

I appreciate the information. It appears very similar to what we permitted in Clearwater, Florida for aquifer recharge. I will contact you with any questions about EPA’s role.

Mr. Haberfeld,

My colleague, Roger Reinhart, asked that I share information relating to an aquifer recharge project underway in the Commonwealth of Virginia. Attached are two links to background information you may find interesting. If you wish to chat about the EPA role/involvement with this please contact me any time.
